

Employment

Bsolus

October 2020 – Present

Software Engineer, Intern

- Developed a marketing automation software architecture, followed by its implementation by the company.
- Implemented third party integration with features such as e-goi.
- Implemented e-commerce marketing campaigns such as Christmas, end New Year, etc.

Education

University of Minho

2016 – 2021

- Integrated Master's in Informatics Engineering specialized in Computer Graphics and Parallel Computing, July 2021. Grade: 16/20.
- Bachelor's in Informatics Engineering, July 2019. Grade 13/20.

Technical Experience

Projects

- **Interactive Wind** (2020). Developed a real time realistic wind simulation in GLSL. Focus of the project was to research known implementations of wind interaction with multiple objects and combine them into a realistic solution to integrate with an engine using shaders.
- **Procedural Terrain Generation** (2020). Developed a real time procedural physically accurate terrain generator. Focus of the project was to use well know graphical algorithms like Perlin noise and combine them into a procedural terrain generator using shaders.
- **3D Engine** (2021 - Current). Developed a 3D Engine that supports the creation of 3D shaders pipelines. It integrates both rasterization and ray tracing. Increased skills in C++ and MSDN.

Technical skills

- **Advanced** C++; C; Java; GLSL;
- **Intermediate** Lots of stuff;
- **Basic** Haskell; Prolog; Flex/Yacc;

Languages

- Portuguese - Native speaker
- English - C1 level
