## Employment

---

### Bsolus

October 2020 – November 2021

Software Engineer

- Designed and developed a Marketing Automation platform based on a microservices architecture with horizontal scalability. Developed the CI/CD pipeline integrating with the AWS.
- Maintained E-commerce platforms.
- Technologies utilized: NestJs, TypeScript, Docker, SQL, MongoDB, Terraform, GCP, Bitbucket, Jira, Git, PHP, SQL.

## Education

---

### University of Minho

October 2016 – April 2022

- Master's degree in Informatics Engineering specialized in Computer Graphics and Parallel & Distributed Computing.
- Bachelor's degree in Informatics Engineering, July 2019.

## Technical Experience

---

### Projects

- **Ray tracer** (2020). Implemented Ray tracing algorithms in C++ and CUDA, optimized the implement by adding features such as russian roulette, Parallel BBVH, multi-threading.
- **Interactive Wind** (2020). Developed a real time realistic wind simulation in GLSL. Focus of the project was to research known implementations of wind interaction with multiple objects and combine them into a realistic solution to integrate with an engine using shaders.
- **Procedural Terrain Generation** (2019-2020). Developed a real time procedural physically accurate terrain generator. The focus of the project was to research and implement graphical algorithms published on research papers. Then combine them into a procedural terrain generator using shaders.

## Technical skills

---

- **Advanced** C++; C;
- **Intermediate** GLSL; Bash; Python;
- **Basic** Vimscrip; Lua; CUDA;

## Languages

---

- Portuguese - Native speaker
- English - C1 level
